VSX

Versus X took the pressure relief channel concept of fi'zi:k's successful Versus saddles and expanded it further with a channel design that has a smoother, more ergonomically-shaped profile that improves comfort and relieves the sensation of pressure.

Versus X feature a channel width up to 30mm and depth up to 20mm for optimum pressure relief.

SPINE FLEXIBILITY DRIVES SADDLE AND HANDLEBAR COMPATIBILITY

By drawing on the knowledge we know about spine curvature we are able to match riders not only to the correct saddle, but also the correct handlebar; this ensures that riders gain the maximum performance and comfort from our products.

LIFE IS A ROAD AND THE ROAD IS MY LIFE.

THE COMFORT
CHANNEL

The Versus range combine the design, materials and profiles of many models of fi'zi:k saddles with a special pressure-relieving Comfort Channel running the length of the saddle.

The Versus X range of saddles applies the Comfort Channel with a wider and deeper channel dimensions featuring a more ergonomic, curved profile.

THE COMFORT
CHANNEL

To ensure that fi'zi:k's mountain bike saddles are available with perfect fit, the Versus model's Comfort Channel features on the Tundra Vs, Gobi Vs and Thar Vs. The Comfort Channel allows for optimum comfort and positioning on climbs, descents and in race conditions, whatever your MTB discipline.
