ENGLAND

CONTENTS

ORIGINAL LEATHER SADDLES

The original and best. Explore our range of saddles for every type of cycling.

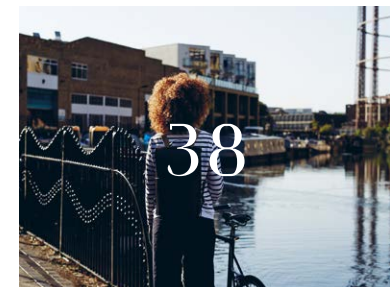

THE CAMBIUM RANGE

The newest generation of Brooks Saddles blends comfort and modern performance.

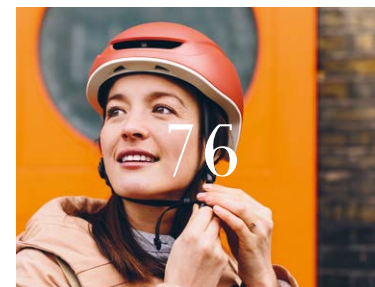

GRIPS, TAPE, ACCOUTREMENTS

Comfort for your hands whether Road, MTB, City & Touring.

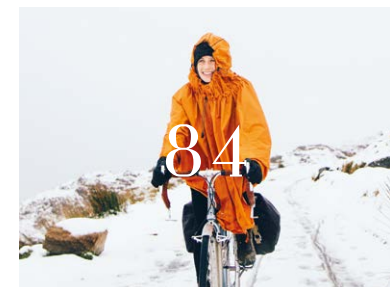

CYCLE BAGS

The most stylish solutions for carrying both on and off the bike.

HELMETS

Protective headgear combining style and safety for every day.

JOHN BOULTBEE RANGE

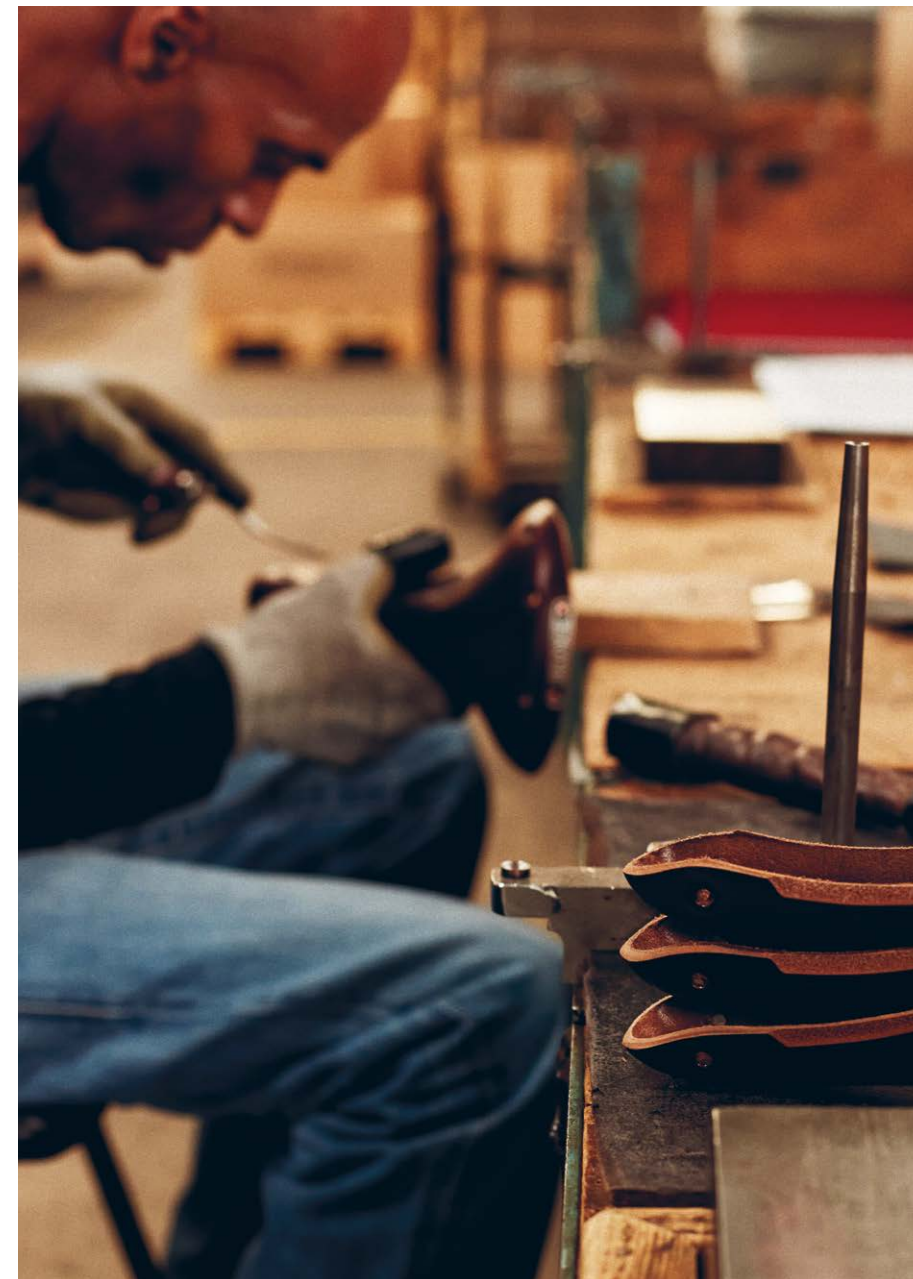

Outerwear inspired by and designed in the Brooks tradition.

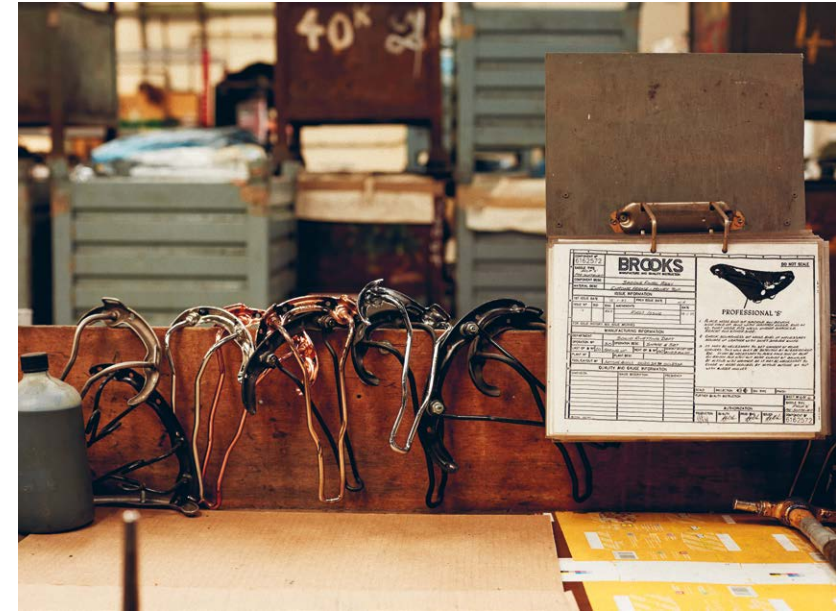

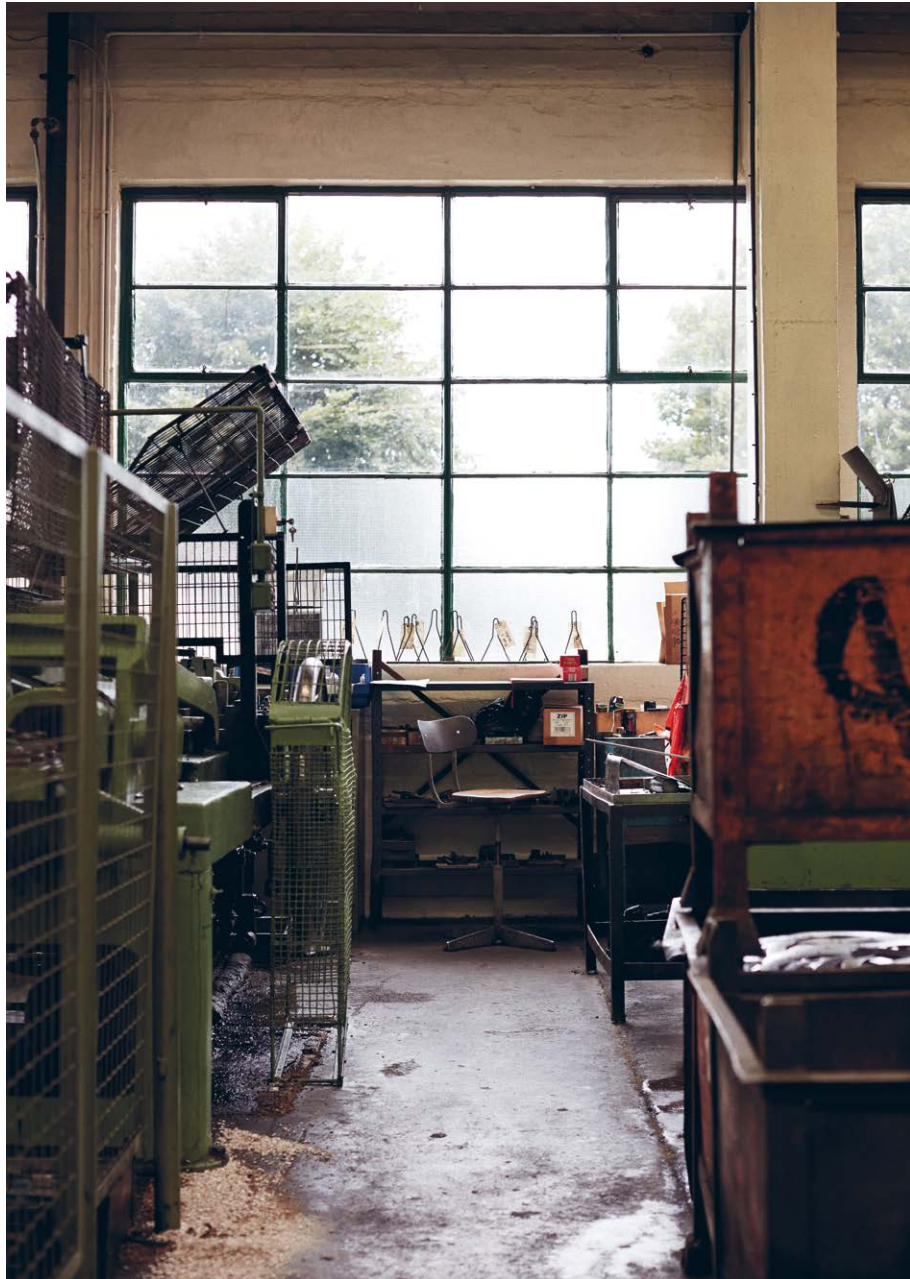

BROOKS ORIGINAL LEATHER SADDLES

The Brooks Saddle has not changed in over a century, which speaks volumes as to how fine a material leather is. It is firm, yet flexible, and moulds perfectly to the rider, rewarding them with a state of optimum comfort. Only specific types of leather can be used and great care must be taken to select the very best for Brooks tops. We want to ensure your future custom, so that by looking after you we do the same for ourselves and in the surest way possible. Moreover, having cycled many a mile and for a good many years, you can take comfort in our recommendations being founded upon real experience.

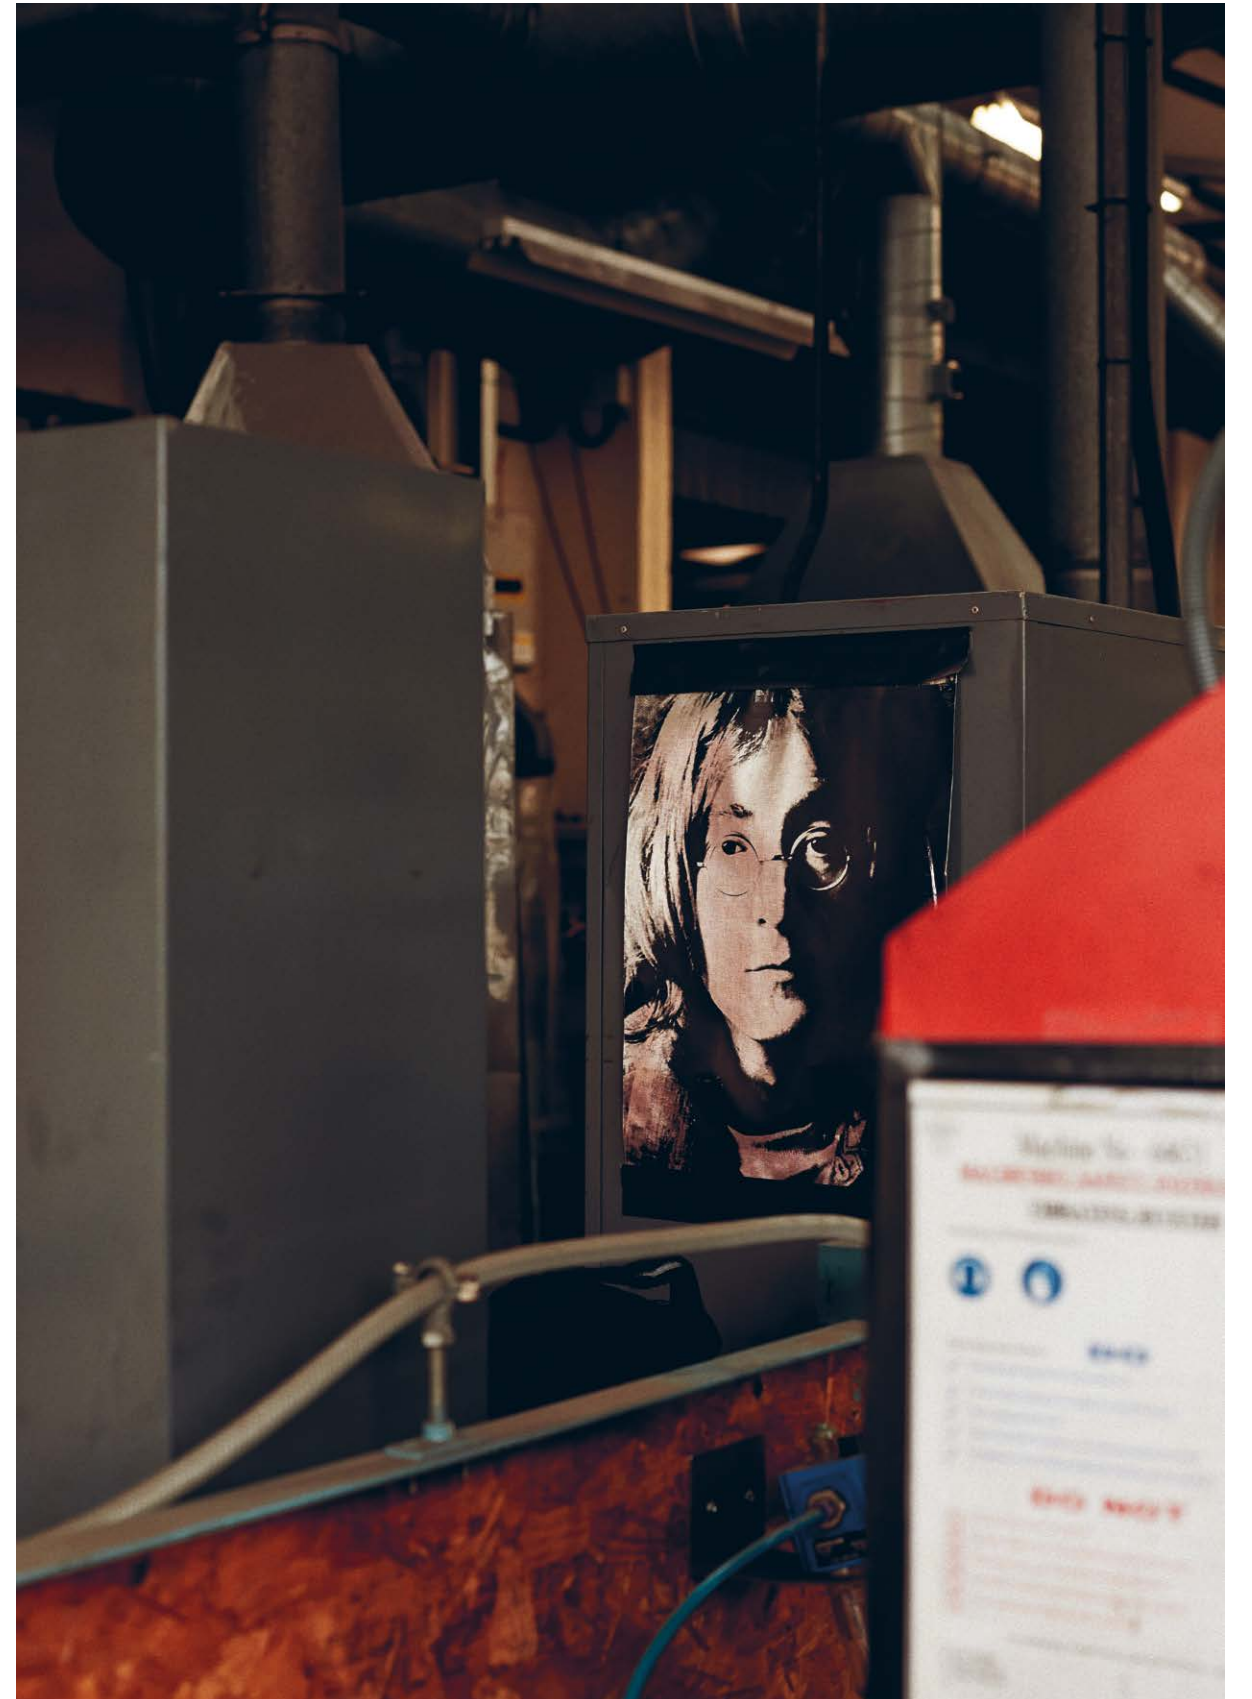

BROOKS
LEATHER
SADDLES ARE
HANDMADE IN
SMETHWICK
ENGLAND

An ingenious design, hardened leather is suspended to a durable metal frame allowing for the famous hammock-like performance long treasured by the high-mileage cyclist. The natural material possesses unique performance properties that can often last through decades of use. In the event of mishap, it can be repaired in our Birmingham factory, providing many more years of reliable service.

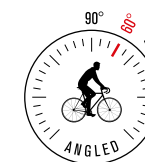

SADDLES FOR EVERY STYLE OF RIDING

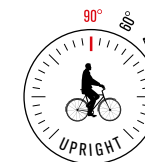

We make saddles for every cyclist, but which is the right for you? The selection of your saddle is a delicate, yet uncomplicated matter. Simply put, the more upright your seated position, the wider the saddle and need for added suspension. Luckily Brooks has been addressing these issues for over a century and offers saddles in different widths for every style of riding, from racing and touring to upright riding in the city.

ORIGINAL LEATHER SADDLES

B15 Swallow Ti
L285 x W153 x H62mm / 370g

The Swallow is the most elastic of our range of saddles primarily intended for racing use. The current model was designed in 1937, when it was introduced in our annual catalogue as a saddle to assist riders who are anxious to convert every ounce of energy into driving power who will profit by the entire absence of impediment to thigh thrust. The principle feature of the Swallow is the slim cut-away shape of the leather upper, which has a noticeably narrow nose section.

ORIGINAL LEATHER SADDLES

The B17 saddle, intended for the touring and trekking cyclist, has been our best selling model for over a century. First introduced in the 1890s, the B17 has survived virtually unchanged, and has firmly established itself as the saddle of choice for long distance cyclists. Banish discomfort and numbness atop the perennial and iconic B17, a slightly wider saddle than those in our sporting range, available today in a broad array of variations ranging from pre-aged leather to fashionably bright colours.

LEGENDARY COMFORT

Our durable copper rivets are hand hammered and finished by skilled craftsmen.

5.
The iconic Brooks backplate has been a hallmark of quality for over 150 years.

ORIGINAL LEATHER SADDLES

B67
L260 x W205 x H73 mm / 850 g

B67 S
L240 x W205 x H85 / 810 g

The B67 has been our most popular design for urban cycling and light touring for over a century. The reason is simple - cyclists who ride in a mostly upright position need a wider saddle with springs to relieve pressure otherwise absorbed by the flesh and bones. The result is a beautiful and durable saddle that allows the rider to float with ease in the city or abroad.

UNIQUE
FLEXIBILITY
AND
PERFORMANCE
OF THE
VULCANISED
NATURAL
RUBBER

THE CAMBIUM

The saddles comprising the Cambium range feature a durable, waterproof and maintenance-free upper made from a strong, yet supple, vulcanised natural rubber, to which a layer of textile is bonded. This revolutionary, uniquely flexible top is suspended upon the frame, functioning much like a hammock to comply with the motion of the rider and absorb shocks and vibrations. It is this unique performance characteristic that sets Cambium Saddles apart from the competition. Whether the jarring cobbles of the pavé, the uncertain conditions of an autumn cyclocross race, the intensity of a criterium, or the exhaustion of an ultramarathon event, the Cambium guarantees to keep the rider not only comfortable, but connected to his or her machine like no other saddle on the market. The vulcanised rubber top is not only waterproof, but built in such a way as to be practically indestructible. It is thereby perfect for the cyclist who desires the most practical and reliable saddle upon which to enjoy the journey of a lifetime, or a lifetime of journeys.

CAMBIUM ORGANIC

The Cambium Organic is made with vulcanised natural rubber and organic cotton and offers extraordinary comfort. The surface of the Cambium top moves and flows naturally with the movement of the rider for better pedalling and control. The hard-wearing top, die-cast aluminium structure, and tubular steel rails allow the Cambium to stand up to many years of hard use, something which will be appreciated by racers of all disciplines.

CAMBIUM C13

The lightest Cambium ever. The C13 features the uniquely flexible, vulcanised rubber top supported by a weight saving carbon frame. This design, like all Cambium models, absorbs shocks and vibrations to keep the rider in better control than common saddles with a static base and foam padding.

Available in 3 widths, in both Standard and Carved versions, the C13 range has been developed following the test phase of our original C13, and provides a saddle for every performance rider.

THE
BIKE

Robust, beautiful, well-crafted...the same synonyms for Brooks Saddles also applies to Brooks Cycle Bags. Made for the needs of the cyclist both on and off the bike, our bags are available in various lines organised by details, materials, and type of use. Whether a fine leather bag for the office, a practical commuter bag for the bike, or a fun and stylish carry all for the street, the Brooks range is wide and worth exploring. Whatever the product category, Brooks is committed to producing designs utilizing the best materials and construction techniques, keeping alive the proud and timeless traditions which make Brooks products sought after by discerning cyclists to this day.

BROOKS CYCLE HELMETS

The creation of Brooks Helmets was a timely process, our research and development lasted a number of years and we considered every aspect of design, production and safety with the utmost attention in that period. After thoroughly exploring the performance required from a helmet we have created a product that delivers on both style and function. Our sleek, understated models complement the modern style of today's cyclist. With ample ventilation, EPS protection, multi-fit adjustment, and antibacterial padding, Brooks Helmets offer everything you might need.
