SELLE ROYAL
SUPPORT CYCLISTS

People are
increasingly
embracing a
two-wheeled
lifestyle.

A smart choice
because riding
a bicycle is
an enriching
experience.

Riccardo Bigolin, founder of Selle Royal

Riding in comfort since 1956

Selle Royal has been a world-leading bicycle saddle brand for over 50 years. Our history is one of continuous innovation built on research, technology, and advanced design. Present in over 70 countries around the world today, with product lines designed for every type of riding, Selle Royal is the first choice for individual cyclists and major bicycle manufacturers alike.

Selle Royal is our name. Supporting cyclists is our mission. Come and explore our way of riding.

Selle Royal

Cyclists Riding Position

Riding position has naturally the most influence on how the sit bones and other intimate parts of the body contact the saddle.

It's these contact points that must be addressed with specific saddle designs. Selle Royal has categorized 4 riding positions to address these important contact areas: Sport, Athletic, Moderate and Relaxed.

SPORT 15°

The Sport rider typically sits on the saddle with a 15-degree spine angle. This position places the sit bones towards the front of the saddle.

ATHLETIC 30°

The Athletic rider typically sits on the saddle with a 30-degree spine angle. This more upright position moves the weight distribution and sit bone area farther back on a saddle.

MODERATE 60°

The Moderate rider typically sits on the saddle with a 60-degree spine angle. This position continues to move the rider's weight and sit bones farther back on a wider saddle.

RELAXED 90°

The Relaxed rider typically sits upright with a 90-degree spine angle. This position places over 60% of the rider's weight directly over the rear of the saddle.

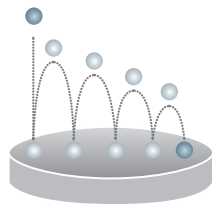

Royalgel™, Maximum Comfort, Top Pressure Reduction

Used under sole license by Selle Royal, Royalgel™ is an exclusive gel patented by Bayer Material Science in Germany. Royalgel™ is a polyurethane matrix material that is injected directly under the saddle cover during the production process. It is the only gel which does not age, harden or migrate.

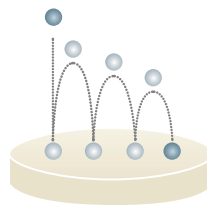

It is clearly distinctive from all other gel materials for a simple reason: other types of gel are molded with a honeycomb structure, using hard, but elastic compact materials, which do not deform, but simply collapse under weight. Hence, it does not provide the modular adaptation quality of Royalgel™.

SHOCK ABSORPTION TEST

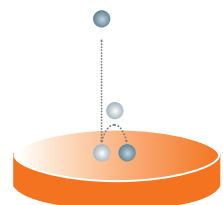

If you let a steel ball drop from a height of 30 cm (1 ft), Royalgel™ will absorb shocks far better than the ordinary foam or gel padding of the competition, demonstrated clearly as shockwaves disappear inside the Royalgel™ padding and away from the cyclist's body. The number and height of rebounds indicate the capacity to absorb shock. The smaller and shorter the rebound, the higher the shock absorption properties.

Ordinary Foam

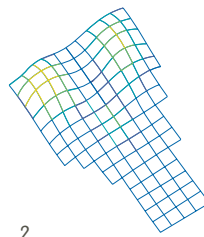

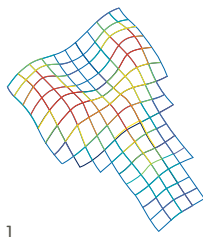

Ordinary Gel

Royalgel™

PRESSURE DISTRIBUTION TEST

Scientific tests have proven that Royalgel™ padding reduces pressure on the pubis and ischial areas by up to 40% compared to other gel and non-gel saddles to provide the maximum level of comfort through better weight distribution across its entire surface.

1. Saddle with Ordinary Foam
2. Saddle with ROYALGEL™

● Pain ● Comfort

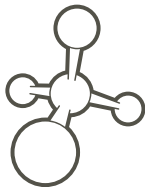

Features

Tradition and innovation

Selle Royal has over 50 years' experience researching and developing innovative materials, designs and advanced technology to produce the most comfortable high performance saddles on the market.

Check out on the technical table for each specific saddle to see if a particular feature is available.

TECHNOLOGY

ROYALGEL™

Royalgel™ guarantees the highest level of comfort, reducing pressure peaks by up to 40% thanks to its unique tridimensional gel structure.

HAND MADE

Selle Royal combines more than 50 years of craftsmanship with the best of modern technology.

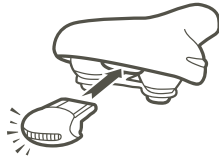

WATER RESISTANT

Royal Vacuum Light is a Selle Royal Technology that allows the saddle to be 100% sealed and 20% lighter than ordinary saddles of the same category.

²⁵
Mn

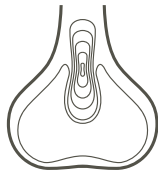

MANGANESE RAIL

Manganese rails reduce weight compared to normal saddle rails.

INTEGRATED CLIP SYSTEM

A patented clip system positioned at the rear of the saddle for easy attachment of a light or saddle bag.

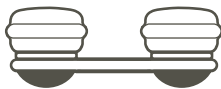

PLUG-IN

An extremely soft Royalgel™ insert is integrated preventing compression of the perineal area for increased comfort on long journeys.

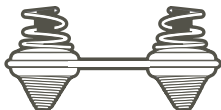

FOAM MATRIX

The foam matrix open cell structure confers increased elasticity and breathability to guarantee a durable and comfortable saddle.

ELASTOMERS

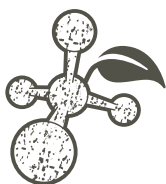

Safe, silent and permanently non-deformable, an elastomer can absorb even the severest and most unexpected shocks, because it works vertically and horizontally.

DOUBLE SPRINGS

Some Premium and Classic saddles are equipped with double springs to guarantee a great suspension with their two complementary movements.

ECO FRIENDLY

CORKGEL

An innovative material based on an organically-sourced polyurethane gel combined with natural cork.

LESS FOSSIL MORE GREEN

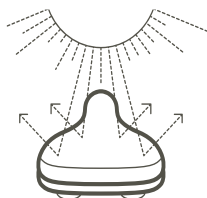

A major advance in the development of an environmentally-friendly saddle and a representation of our long-standing commitment to a "less fossil, more green" way of life.

NATURAL OIL

Foam and Elastomers are formulated using natural oil polyols, such as Castor Oil from sustainable cultivation, Palm Kernel Oil and Soybean Oil.

COVER

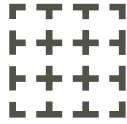

COOL COVER

Our extraordinary cover is up to 25°C cooler than normal black saddles due to our special material which reflects sunlight.

LEATHER COVER

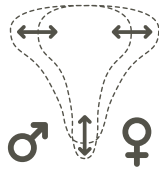

Cover is made from 100% natural leather.

STRENGTEX

The cover is made from a unique layer of elastic material to guarantee a saddle of great durability.

SHAPE

ANATOMICAL DESIGN

Designed to accommodate the different male and female anatomical structures.

VENTILATION CHANNEL

Relieves pressure on the perineal area, while reducing uncomfortable perspiration.

EVERYDAY COMFORT

Owing to its utilitarian design, this saddle is suitable for most any kind of daily activity.

E-BIKE

This saddle has been specifically designed to provide maximum comfort to the E-bike user.

respiro

respiro

RESPIRO

Start cool stay cool

Leaving a bike in the sun or riding in hot weather can raise your saddle temperature to an uncomfortable level. To avoid unpleasant perspiration and discomfort, the Respiro line is designed with a ventilation channel and special materials to minimize saddle heat.

HOW TO READ OUR NEW PACKAGING

Innovative, user-friendly, and suitable for the environment. Our new packaging is realized on a FSC certificated paper and designed to help you learn more about individual Selle Royal saddle features.

The riding position is indicated with a sticker that specify also the anatomical shape preference.

The icons highlight the main features of the saddles.

The innovative insert allows you to deepen the general plus of the product.

The description of the line and of each feature is well explained inside the insert in 6 languages.

The QR code connect you to a dedicated web page in which you can find further info and the other products.

ARE YOU A DEALER? GEO-LOCATE YOURSELF!

Are you a Selle Royal dealer and wish to be listed on our website where potential customers can easily find you?
Then please visit

http://www.selleroyal.com/New_Dealer.aspx

and carefully enter your details in the registration form. You may also attach photos and provide a link to your website and other contact information.

Take advantage of this excellent possibility to have higher visibility on the web by appearing as an exclusive Selle Royal partner!

**WORLDWIDE CYCLING
ATLAS**

The “Worldwide Cycling Atlas” is an editorial project of Selle Royal that aims to develop a worldwide roster of the most significant projects, organizations and individuals that share our vision of cycling and life.

Whether you are part of a bicycle advocacy group, or simply people that use the bike as leitmotiv, you may register your association, project, or group, while adding videos, photos or other content.

A book will be published and distributed around the world to give higher visibility to these diverse initiatives, and every year a commission will then reward the best stories on the basis of their creativity and environmental and social relevance.
